## Improving how we train

Don Merriam, Operations Manager, LPG

The 2016 Regional training and assessments are nearly complete.

The incident event reports I distribute to RMAs and Response Team Leaders (RTLs), detail the challenges that were encountered and resolved at the time of the incident. During Regionals, I like to discuss the challenges faced at these incidents to bring awareness and experience to responders who may encounter these challenges at future incidents.

While our web-based training modules will see further updates this winter, we have already added optional training modules, such as LPG firefighting, to supplement the mandatory modules you must follow. Please take advantage of this valuable learning opportunity.

I make a point of saying at every Regional, “what can I do to make this more beneficial to you?” Please forward any suggestions on what you feel would enhance the Regional training and assessment experience.
