Update on ERAC's Learning Management System Training

Cheryl Dahlager, Manager, Process Services

ERAC has updated the WHMIS training requirement on ERAC's Learning Management System (LMS), SafetySync. We have removed WHMIS 1988 from your training portal and have enabled WHMIS 2015 as a new mandatory certificate requirement. There are two options in order to meet this new certificate requirement. You can upload your employer provided WHMIS certificate to ERAC's LMS or, alternatively, ERAC has enabled WHMIS 2015 in your 'Online Courses' as an optional requirement. If you take the course through ERAC's LMS, your certificate will automatically upload and mark you as compliant. We ask you to please have this completed by December 1, 2016. This will affect your overall compliance.

To upload your WHMIS training certificate to ERAC's LMS, please log into SafetySync (www.safetysync.com) and click on Training (left hand side of your screen) then Certificate Tracking. Under "Required" you will notice that a WHMIS certificate has been added. Click on the certificate, then click on Enter Completed Certificate to upload to SafetySync. Enter all the necessary details then click on Choose File at which time you can upload your certificate.

Alternatively, please contact Cheryl Dahlager at cheryl.dahlager@erac.org or Shandie Hildebrand at shandie.hildebrand@erac.org, either of whom can upload your certificate for you.

A reminder that we require a copy of your CN and CP eRailSafe badge to ensure you are compliant. A temporary certificate is issued when you complete the course. It is only valid for 3 months which is why we require a copy of the badge with the three-year expiry date to ensure compliance.
