

Saskatchewan Library Week: An opportunity to Profile and Promote the Key Role of Saskatchewan Libraries

Libraries across the province are planning events for Library Week 2019 being held from October 20-26. This week provides an opportunity for the library community to collectively profile and promote the value of libraries.

The theme for 2019 Saskatchewan Library Week is “Libraries: Building the Future.” This theme reflects the significant contribution of libraries to the growth and development of Saskatchewan communities. Libraries are dynamic and leading edge, advancing innovation, promoting lifelong learning, and supporting cultural and public engagement. Through their multiple roles, diverse programs and services, libraries support the health and wellbeing of all Saskatchewan residents.

Posters for Library Week which include translations in the Cree, Dene and French languages are now being mailed to all types of libraries and Members of our Legislative Assembly.

If you have not already planned to do so, please consider planning an event or taking steps to celebrate libraries during October 20-26.
