

ENVIRONMENTAL HEALTH & SAFETY

Focused on customized training to meet your needs, and technical assistance to ensure compliance is not only met but often times exceeded.

HEAT ILLNESS PREVENTION: WHAT EMPLOYERS SHOULD BE DOING NOW

Workplace safety regulations are evolving, and Heat Illness Prevention is a growing priority for OSHA. The agency is developing a formal federal heat standard that will apply to both outdoor and indoor workers exposed to high temperatures. In the meantime, OSHA is actively enforcing heat-related hazards under the General Duty Clause.

OSHA has also implemented a National Emphasis Program (NEP) on Heat Hazards, signaling that inspections and enforcement related to heat stress remain a strong focus.

Employers should act now by implementing core prevention measures, including:

- Providing access to cool drinking water
- Scheduling regular rest breaks in shaded or cooled areas
- Following acclimatization protocols for new or returning workers
- Training employees and supervisors to recognize heat illness symptoms

Proactive heat safety is not optional — it's both a regulatory expectation and a responsibility to your workforce.

The Alabama Training Network's EHS Team has years of experience helping companies strengthen safety programs, ensure compliance, and go beyond minimum requirements. Contact us to learn how we can support your Heat Illness Prevention efforts.

WHY CHOOSE ATN

High Return on Investment

- \$64:1 Client Reported

Client Satisfaction

- Focus on Client Success

Trusted Local Partner

- Communities in Alabama

Staff Experience

- 1,000+ Combined Years in MFG

Deep Resource Pool

- Colleges, Universities, MEP's

Customized Service

- To Fit the Needs of Clients

On-Site Delivery

- In-plant; Local Venue; Portable

Flexible Scheduling

- Based on Clients Needs

Accountability

- ISO 9001 Certified, Client Surveys
