

AGRIBUSINESS & FOOD SERVICES

Provides expertise in food safety, quality assurance, and operational improvement.

FARM TO FORK FOOD SAFETY

As food safety expectations continue to grow across the supply chain, produce safety has become increasingly important for farms of all sizes. With local producers now supplying farmers' markets, restaurants, and K12 school systems across Alabama, understanding food safety risks and traceability requirements is essential.

To help support growers, the Produce Safety Alliance Grower Training Course will be offered virtually on July 28–29 from 1:00–5:00 p.m. CST at no cost through the Alabama Department of Agriculture and Industries (ADAI). The course will be taught collaboratively by experts from ADAI and ATN's Agribusiness & Food Services Project Engineer, Amanda Rials, and will include updated information on the Traceability Final Rule Draft.

Please see the flyer below for additional details and registration information. Participants must register and attend individually to receive a certificate.
