

LSB-CHE recently sponsored 14 employees to complete the 40-Hour HAZWOPER and Confined Space Rescue training course through Alabama Training Network at Northwest Shoals Community College. This training was made possible in part through a \$15,000 workforce development grant awarded by the Alabama Community College System. The program enhanced participants' understanding of hazardous materials response, regulatory requirements, and safe confined space entry procedures, further strengthening the company's commitment to workplace safety and compliance.
