

ENVIRONMENTAL HEALTH & SAFETY

Focused on customized training to meet your needs, and technical assistance to ensure compliance is not only met but often times exceeded.

OSHA ENFORCEMENT CONTINUES TO INCREASE IN 2026

OSHA continues to prioritize workplace safety through targeted inspections in 2026, with a strong focus on high-hazard industries. For Alabama employers, this means now is the time to review safety programs and ensure employees are prepared.

Current enforcement efforts are centered on three key industries:

- Construction: Fall protection, scaffolding, trenching, and struck-by hazards.
- Manufacturing: Machine guarding, lockout/tagout procedures, and amputation prevention.
- Warehousing & Logistics: Powered industrial truck safety, material handling, ergonomics, and heat illness prevention.

The strongest safety programs don't wait for an OSHA inspection. They focus on the fundamentals—conducting regular job hazard analyses, encouraging near-miss reporting, providing hands-on safety training, empowering supervisors to identify and correct hazards, and implementing heat illness prevention plans for both indoor and outdoor work.

As a Federal OSHA state, these national priorities apply directly to Alabama employers. ATN's Environmental Health & Safety team is available to help organizations strengthen their safety programs through customized training, compliance assessments, and safety audits. Taking a proactive approach today can reduce risk, improve workplace safety, and help your organization remain inspection-ready year-round.

WHY CHOOSE ATN

High Return on Investment

- \$253.31 Client Reported

Client Satisfaction

- Focus on Client Success

Trusted Local Partner

- Communities in Alabama

Staff Experience

- 1,200+ Combined Years in MFG

Deep Resource Pool

- Colleges, Universities, MEP's

Customized Service

- To Fit the Needs of Clients

On-Site Delivery

- In-plant; Local Venue; Portable

Flexible Scheduling

- Based on Clients Needs

Accountability

- ISO 9001 Certified, Client Surveys
