**REFLEX SIGHT MOUNTS**  
for Tactical Shotguns

## Catalog 30 marks the 20th anniversary of the establishment of Mesa Tactical.

From our (extremely) humble beginnings in a 700 square foot office overlooking the Pacific Ocean in Costa Mesa, CA, to our position as one of the leading suppliers of tactical accessories for America's law enforcement professionals, it's been a wild and rewarding journey. Many of you have been along with us for the ride, but this is a fine moment to run through some of the highlights:

**2004** - Mesa Tactical first exhibits at SHOT Show in Las Vegas, finally shipping our first product, the investment cast aluminum High-Tube® Telescoping Stock Adapters for pump shotguns, later in the year. The High-Tube® Telescoping Stock Adapter and stock system for the Remington 870 is still produced.

**2005** - The SureShell shell carriers are introduced as accessories for the High-tube stocks. That year we also develop versions to fit directly to the sides of shotguns, and the rugged design is immediately recognized by law enforcement professionals as a high quality alternative to plastic carriers already on the market. In the following two decades, Mesa Tactical will go on to sell over 200,000 SureShell carriers.

**2007** - The revolutionary hydraulic recoil reduction system for our stock adapter kits hits the market, with hundreds of stocks later procured by America's largest LE agency.

**2013** - Mesa Tactical moves for the third time in eight years to a 10,000 square foot freestanding facility in north Costa Mesa.

**2016** - This year marks the biggest change yet, with Mesa Tactical upping stakes and moving to Reno, NV. We also begin shipping the lower cost polymer version of our SureShell® carrier.

**2020** - At the request of a major Federal LE agency, the LEO stock adapters are reworked into the far more comfortable and practical Gen II.

**2022** - Mesa Tactical introduces SureShell carriers with integrated reflex sight mounts, beginning with the Trijicon RMR footprint.

**2024** - We continue to expand platform support for the Truckee forends (including the venerable Remington 870), introduce dedicated reflex mounts for shotguns, and announce a new line of handy shop tools for armorers. Mesa Tactical is poised to continue our record of innovation for the next twenty years.

NEW FOR 2024

## REFLEX SIGHT MOUNTS FOR SHOTGUNS

This year Mesa Tactical introduces a line of dedicated reflex sight mounts for tactical shotguns. The first footprint supported is the Trijicon® RMR® footprint. When installed on Benelli and Beretta shotguns, the reflex sight co-witnesses with the factory ghost ring sights. Currently we support Benelli M2 Tactical, Benelli M4 and Beretta 1301 Tactical shotguns.

Optics that use the RMR footprint, such as the Trijicon® RMR® and SRO, Holosun 407C, 507C, 508T, and Riton X3 Tactix PRD, are all compatible with Mesa Tactical's reflex sight mounts.

Part No	Platform	Footprint
90400	Benelli M2 Tactical	Trijicon RMR
90410	Benelli M4	Trijicon RMR
90590	Beretta 1301 Tactical	Trijicon RMR

NEW FOR 2024

## TRUCKEE® FOREND FOR REMINGTON 870

The Truckee line of M-LOK® compatible aluminum forends continues to expand! This year we are excited to introduce three new Truckee forends for the Remington 870 shotgun. Finally, there is a simple, reliable way to attach weapon lights and other accessories to pump-action shotguns.

Truckee forends are machined from 6061-T6 aluminum and are equipped with M-LOK® slots on the sides and bottom, providing versatile options for accessory attachment. They feature a hard anodized finish for added durability and protection. Installation is hassle-free, and the new Remington 870 models come with a special forend nut wrench to make the job easier.

The Truckee Forend for the Remington 870 is available in three lengths. The shortest forend, at 7½ inches long, is designed to be compatible with the Mesa Tactical SureShell Carrier with Fallon Rail for the Remington 870 Tac-14. Also offered in 9 inch and 10½ inches.

### TRUCKEE FOREND

SKU	Platform	Length	Gauge
93270	Remington 870	7½ in	12-GA
93280	Remington 870	9 in	12-GA
93290	Remington 870	10½ in	12-GA

## URBINO® PISTOL GRIP STOCK FOR SHOTGUNS

- Tailor-made for law enforcement and military operators.
- Boasts a reduced 12½-inch length-of-pull, allowing for swift handling and compatibility with body armor and other load-bearing gear.
- Includes an optional adjustable cheek riser that facilitates proper cheek weld with sights or optics, and it can be adjusted without requiring any tools.
- Features a Santoprene rubber pistol grip, offering exceptional control, comfort, and reduced fatigue during extended use.
- The option of a Limbsaver® butt pad is available to further reduce felt recoil.
- Provides various sling attachment options, including pocket sling mounts situated between the receiver and the stock.
- Cheek risers cannot be retro-fitted to standard models.
- Compatible with a variety of shotgun models, including Remington 870/1100/1187, Mossberg 930/940, Beretta 1301, and Benelli M2, Benelli M4 and SuperNova shotguns.

## URBINO® PISTOL GRIP STOCK

The Urbino tactical stock was developed more than a decade ago in response to the demands of law enforcement for a shorter length-of-pull stock, tailored for tactical applications, especially for use with body armor. Urbino stocks are known for their durability, ease of shouldering, slip resistance, and its ability to enhance both comfort and control.

## LEO® TELESCOPING STOCK ADAPTER & KITS FOR SHOTGUNS

- Utilizes an M1911 pistol grip angle, providing a more comfortable space for the webbing of the operator's thumb, both above and behind the grip.
- The enhanced grip angle allows for the use of more comfortable beavertail AR-15 grips, such as the Mesatac Trego grip (included in complete LEO Gen II Stock Kits).
- The pistol grip configuration enhances control and comfort during use.

The LEO Gen II Telescoping Stock Adapter for tactical shotguns represents the second iteration of Mesa Tactical's LEO adapters. This redesigned LEO adapter offers increased comfort, superior handling, and enhanced configuration versatility.

- An optional KynSHOT® hydraulic recoil buffer is available, offering up to a 90% reduction in recoil.
- Stock Kits include an aluminum stock adapter, a 6-position receiver extension tube, or a 5-position hydraulic buffer, an M4 carbine buttstock, Mesatac® Trego™ grip, push-button sling swivel, and all necessary mounting hardware.
- Versions are available for Remington 870, Remington V3, Mossberg 500/590 and Beretta 1301 shotguns.

# HIGH-TUBE® TELESCOPING

## STOCK ADAPTER & KITS FOR SHOTGUNS

Mesa Tactical's High-Tube® stock adapters are designed to align the shotgun barrel bore with the stock, creating similar handling characteristics reminiscent of an AR-15. These adapters are tailored for specific law enforcement applications or competitive shooting. High-Tube adapters enable a proper cheek weld and eye alignment when using optics.

- The comb height is equivalent to that of an AR-15, ensuring a comfortable and familiar shooting position.
- Most High-Tube adapter kits come equipped with a 9½ inch Picatinny top rail, facilitating the attachment of optics and accessories.
- These adapters are optimized for use with optics or AR-style sights, enhancing aiming precision.
- Available for Remington 870 shotguns.

## BREACHING SHOTGUN STOCK REPLACEMENT PLUG

The breaching shotgun stock replacement plug is a versatile accessory that can be installed into any Mesa Tactical LEO or High-Tube stock adapter. It replaces a shotgun's stock, offering a solid steel design with a push-button QD (quick-detach) attachment point. By replacing the stock with Mesa Tactical's replacement plug, the operator gains greater freedom of movement and the ability to use a single-point sling, which is advantageous for breaching applications. Sling swivel not included.

- Replaces the telescoping stock receiver extension tube used with any Mesa Tactical telescoping stock system.
- Features an all-steel threaded plug with a rugged black oxide finish for durability and reliability.
- Includes a Mesa Tactical AR-15 Armorer and Bartender's Tool.

## LUCY™ STOCK ADAPTER

### FOR 20-GA SHOTGUNS (REM 870)

Mesa Tactical's Lucy™ stock adapter offers a significant expansion in the variety of butt stocks that can be used with 20-gauge Remington 870/1100/1187 shotguns. This cast steel adapter enables the utilization of 12-gauge Remington 870 stocks, which provides a broader selection of stock options, including Mesa Tactical's Urbino stock and LEO stock adapter.

- Dramatically increases the number and variety of butt stocks compatible with 20-gauge Remington 870 shotguns, offering more options for customization.
- Constructed from cast steel, ensuring strength and durability.
- Compatible with Mesa Tactical's Urbino stocks, telescoping stock adapter kits, and even the KynSHOT hydraulic recoil buffer system, allowing for versatile customization.
- No gunsmithing required.

## TRUCKEE® FORENDS FOR SHOTGUNS

The Truckee aluminum forend provides a straightforward method of mounting weapon lights and other accessories on tactical shotguns. It is designed with industry-standard M-LOK mounting points on both sides and the bottom.

- Made from a combination of 6061-T6 aluminum and high-temp, glass-filled nylon endcaps to provide rugged durability.
- Equipped with industry-standard M-LOK slots, allowing you to attach your preferred M-LOK accessories.
- The Truckee forend complies with Federal Law 18 USC §922(r) as a single US-made part.
- Installation is quick and hassle-free, and the forend remains on the barrel when the weapon is stripped for cleaning.
- Available for a growing range of shotgun models, including Benelli M2, Benelli M4, Beretta 1301, Remington 870 and Tac-14. Additional platform support is on the way.

SKU	Part No	Type	Size

# SURESHELL® ON-GUN SHOTSHELL CARRIERS

## OVERVIEW

Mesa Tactical's SureShell® carrier has a notable history in the realm of on-gun shell carrier solutions. It was among the first to be developed specifically to meet the demanding needs of law enforcement, with valuable input from law enforcement professionals. Since its introduction in 2005, over 200,000 SureShell carriers have been sold and have become a standard issue accessory in many American law enforcement agencies.

- Regarded as the best and most durable weapon-mounted shotshell carrier available, designed to withstand the rigors of law enforcement use.
- Features an innovative rubber friction retention system that securely holds shotshells in place, ensuring quick and reliable access.
- Aluminum SureShell carriers are machined from 6061-T6 aluminum and hard-coat anodized in matte black, providing rugged durability and a non-glare finish.
- For those seeking a lighter and cost-effective option, polymer yoked SureShell carriers utilize the same aluminum backplate but incorporate a lightweight injection-molded glass-filled nylon yoke, reducing weight without compromising durability.
- Installation on a variety of tactical shotguns is hassle-free and requires no gunsmithing; all necessary hardware and instructions are included.
- Versions available for almost all popular tactical shotgun models (see chart).

## SURESHELL® SIDE-MOUNT CARRIERS

The SureShell carrier's receiver side mounting system employs custom steel fasteners that replace the shotgun trigger pin(s). This innovative approach ensures a more secure attachment to the shotgun without causing any damage to the receiver. Additionally, the mounting plate is designed in such a way that it leaves the shotgun's serial number visible. This feature simplifies the task of armors who need to keep an inventory of their weapons, as they can easily access and record the serial numbers without disassembling the SureShell carrier.

# SURESHELL® CARRIERS WITH INTEGRATED PICATINNY RAIL

- The aluminum or glass-filled nylon SureShell carrier yoke is securely fastened to a hard-coat anodized 6061-T6 aluminum rail, ensuring durability and reliability.
- The Picatinny (MIL-STD 1913) rail is compatible with a wide range of optics, sights, lights, and lasers, making it a versatile platform for enhancing your shotgun.
- These SureShell shotshell carriers with rails are available for various shotgun models, including Benelli M2, Benelli M4, Benelli SuperNova, Beretta 1301 (Comp and Tactical models), Remington 870/1100/11-87, Remington V3, Remington Tac-13, Remington Tac-14, Mossberg 500/590, Mossberg 590 Shockwave and Kel-Tec KSG shotguns.

Mesa Tactical's SureShell shotshell carriers with rails offer a versatile solution by combining a shell carrier with a MIL-STD-1913 (NATO STANAG 4694) Picatinny rail, which accommodates optics, sights, lasers, and other accessories. These shotshell carrier assemblies can be mounted using a "saddle" style method for Remington shotguns, or by utilizing the drilled and tapped holes on top of the shotgun's receiver on most other models.

## SURESHELL® CARRIER

### WITH INTEGRATED REFLEX SIGHT MOUNTS

Mesa Tactical's line of SureShell carriers with a Trijicon® RMR® reflex sight mount provide a specialized solution for shotgun enthusiasts.

When installed on the shotgun, the reflex sight co-witnesses with the factory ghost ring sights, a crucial requirement for various police agencies.

Optics that use the RMR footprint, such as the Trijicon® RMR® and SRO, Holosun 407C, 507C, 508T, and Riton X3 Tactix PRD, are all compatible with Mesa Tactical's reflex SureShell carriers.

- These carriers feature a precision machined mount designed for a Trijicon RMR reflex sight, which co-witnesses seamlessly with the factory sights on the shotgun.
- Available in both four and six-shell configurations.
- Compatible with Beretta 1301 Tactical, Benelli M2 Tactical, and Benelli M4 shotguns.

#### SURESHELL SHOTSHELL CARRIER AND REFLEX SIGHT MOUNT

#### SURESHELL SHOTSHELL CARRIERS (LESS LETHAL)

SKU	Platform	Yoke	Shells	Color	Gauge
95710	Remington 870/1100/11-87	Nylon	6	Less Lethal Yellow	12-GA
95720	Remington 870/1100/11-87	Nylon	6	Less Lethal Red	12-GA
95730	Remington 870/1100/11-87	Nylon	6	Less Lethal Green	12-GA
95740	Remington 870/1100/11-87	Nylon	6	Safety Orange	12-GA

## SURESHELL® CARRIERS FOR LESS LETHAL SHOTGUNS

Mesa Tactical's SureShell® polymer carrier system is designed to retain six non-lethal shells with reliability and security. The lightweight yet robust aluminum backing plate attaches to the shotgun's receiver using innovative custom mounting hardware, ensuring that your dedicated less-lethal rounds are readily accessible when needed.

- SureShell Polymer Carriers can be ordered in a range of bright colors that align with the requirements of most law enforcement agencies.
- The brightly colored shell carrier facilitates positive identification of assigned less-lethal shotguns.
- The innovative dual-rubber retention system securely holds six shells in place.

## SLING RING® SLING ATTACHMENTS

Mesa Tactical's Sling Ring sling attachment is designed to mount between the stock and the receiver of Remington 870 shotguns, offering a robust loop for the attachment of single-point or three-point slings that use H&K style hooks or Magpul® Paraclip™ attachment points.

- Constructed from cast steel, ensuring durability and strength in contrast to aluminum or metal injection molding (MIM).
- Designed without sharp edges that could catch on webbing or skin, promoting safety and ease of use.
- Available in both left-side and ambidextrous mount configurations to accommodate different user preferences.
- Installation requires no gunsmithing, making it a hassle-free and user-friendly accessory for your shotgun.

### SLING RING SLING MOUNT FOR SHOTGUNS

SKU	Platform	Style	Gauge
92310	Remington 870	Left Side	12-GA
92320	Remington 870	Ambi	12-GA

## PICATINNY RAILS FOR SHOTGUNS

Mesa Tactical's Picatinny Rails are constructed from high-quality 6061-T6 aircraft-grade aluminum and finished with mil-spec Type III hard anodizing for exceptional durability. These Picatinny Rails come complete with all the necessary mounting hardware.

Receiver-mount rails are designed to be affixed to Kel-Tec KSG shotguns, serving as replacements for the factory optics rail. The Picatinny rail for the Kel-Tec KSG features small aluminum flanges on both sides of the main rail, which can accept additional lengths of Picatinny rail for the attachment of weapon lights or targeting lasers (2 inch Picatinny rail included). This rail assembly is securely mounted to the shotgun with a pair of unique steel recoil blocks featuring angled set screws.

- Mil-STD 1913 Picatinny Rails, ensuring compatibility with a wide range of accessories.
- CNC machined from 6061-T6 aluminum, guaranteeing robust and precise construction.
- Comes with all necessary mounting hardware, making installation a hassle-free process.

Mesa Tactical's Picatinny Rails are a reliable choice for firearm owners looking to enhance their Kel-Tec KSG shotgun with versatile accessory options, all constructed with quality materials and precision engineering.

### PICATINNY RAILS FOR SHOTGUNS

SKU	Item	Platform	Gauge	Length
94500	Picatinny Rail	Kel-Tec KSG	12-GA	13 in
93900	High-tube Adapter Mount Pic Rail	Remington 870	12-GA	9½ in
90690	Adapter Mount Picatinny Rail	-	-	2 in

Mesa Tactical offers a line of high-quality tools and accessories for AR-15 and other rifles under the brand name "Mesatac." The initial Mesatac products include the Trego™ grip designed for the AR-15 rifle and the re-released Faro® stock adapter tailored for the FN SCAR rifle. These accessories are designed to enhance the functionality and performance of these firearms.

## MESATAC FARO® STOCK ADAPTER FOR FN SCAR CARBINE

The Faro adapter serves as a solution to enable your FN SCAR rifle to accept any AR-15 stock, offering compatibility and versatility. Installing the Faro adapter is a straightforward process that requires no gunsmithing. Additionally, the Faro adapter comes equipped with steel ambidextrous push-button sling attachment points.

- Adapts the FN SCAR to accept any AR-15 butt stock, expanding your stock options and customization possibilities.
- Mirrors AR-15 stock to top rail height, ensuring compatibility with AR-15 optics and mounts.
- Machined from investment cast aluminum, offering a durable and reliable construction.
- Available in both black and FDE (Flat Dark Earth) finishes.

SKU	Platform	Color
92550	FN SCAR	Black
92560	FN SCAR	FDE

## MESATAC TREGO™ GRIP FOR AR-15 RIFLES

The inaugural grip from Mesatac designed for the AR-15 is a rubber overmolded component featuring a comfortable, grippy texture and a "beavertail" to safeguard the web of the hand. This grip is constructed with a sturdy armature made of tough 20% glass-filled polypropylene, covered by TPE synthetic rubber. The Trego grip is a visually appealing design and provides a comfortable and secure feel when held in the hand.

9385K	AR-15	Black	beavertail
9385F	AR-15	FDE	beavertail

Mesatac AR-15 Armorer and Bartender's Tool

Mesatac AR-15 Torque Rod

**MESATAC**

Mesatac Shotgun Vise Blocks

## GUNSMITHING TOOLS

Mesa Tactical is expanding its line of gunsmithing tools for shotguns and rifles, under the Mesatac brand. The Mesatac AR-15 Armorer and Bartender's Tool is a handy AR-15 stock wrench that can also be used on AR-15 muzzle devices and Mesa Tactical telescoping stock systems. It can also be employed opening beer or pop bottles.

The new Mesatac AR-15 Torque Rod is a handy tool to keep around the shop when building AR-15 upper receivers, installing or removing barrels, or when installing AR-15 barrel nuts. It mounts in a vise for one-handed wrench work.

Mesatac Shotgun Vise Blocks securely and safely hold a shotgun in a vise without the risk of damage or scratches. They are 3D printed from PETG resin.
