

## ***Psychedelics in Brain Health: From Promise to Practice***

***Tuesday, December 2***

***12:00-1:00pm EASTERN***

***VIRTUAL Webinar ~ [Register Here](#)***

### **Overview**

This panel discussion will explore the future of psychedelic medicine as these therapies move closer to FDA approval and clinical adoption. The session will bring together leading voices from science, clinical care, policy, and patient advocacy to examine the opportunities and challenges of integrating psychedelic treatments into our healthcare system. Discussion will span the latest pre-clinical and clinical data, regulatory considerations, access questions, and the broader societal shifts needed to ensure these therapies are delivered equitably and responsibly.

### **Speakers**

**Moderator:** Dr. Mark Rasenick  
Chair, American Brain Coalition

### **Opening Remarks from Person with Lived Experience**

Marcus Capone  
Veteran Navy SEAL
