

AI Regulations & Applications

VIRTUAL TRAINING

Artificial Intelligence (AI) is reshaping how businesses operate at every level, including in the HR function.

Companies are now relying on AI tools to screen resumes, aggregate personnel data, evaluate performance, and make decisions. For HR leaders in California, staying ahead means not only understanding the new technologies, but also navigating an evolving legal and regulatory landscape. Join us for an interactive session where we will cover the latest AI employment regulations in California, how to develop forward-thinking and thoughtful AI policies, and avoid the potential pitfalls.

Workshop Objectives:

- Understand California's compliance obligations when using AI tools in the workplace.
- Develop organizational AI policies that align with legal requirements and ethical standards.
- Avoid pitfalls when using AI tools, such as bias, inaccurate information, misuse and deception, and confidentiality concerns
- Lead your organization through change and address staff concerns around new technologies.

This virtual event will be hosted live! We encourage attendance to receive the full interactive experience and get your questions answered by our HR Subject Matter Experts.

Sponsored by the Central Valley Regional HR Hotline.

Wednesday, May 27, 2026
12:00 - 1:00PM
