

Submitting a Test eCare Plan

Step 1 : Review the **Test eCare Plan**: Click [here](#) to view.

- Demographics of French Fry must match exactly to populate on the collaboration site.
- EnlivenHealth is not able to document a zip code of 00000 for French Fry, so pharmacies will need to use 24563 for the zip code. This will populate as a test eCare plan within the Quality Report that Managing Network Facilitators view but not on the pharmacy's collaboration site profile.

Step 2: Watch recorded demonstration by Technology Solution Provider on how to document the Test eCare Plan.

- Each technology received communication to have an updated recording during Summer 2023. However, not all recorded a new video. Beside each recording is the year of the most recent recording.
