Encounters Documented by 39 Pennsylvania Pharmacies

Provided over Year 1 of Flip the Pharmacy Cohort 1
(October 1, 2019 - October 5, 2020)

Care in Action

A Team PA pharmacy, when launching a blood pressure assessment service, found one of their employee's blood pressure to fall in the **hypertensive urgency** category per AHA guidelines. The **pharmacy continued to monitor her closely** until she was able to schedule a visit with her primary care provider. At that point, the **pharmacists worked with her PCP** to increase her hypertension medication.

They likely saved her a hospitalization for a stroke.

Team PA Encounters Included a **Blood Pressure**

Team PA Encounters Identified a **Medication-Related Problem**

Team PA Encounters Included a **Referral to Care Coordination**

Team PA Encounters Included a **Recent Opioid Prescription**
