

The Speakers

Scott Beuerlein “Making Landscapes that Matter”

Scott is the Manager of Botanical Garden Outreach at the Cincinnati Zoo & Botanical Garden. He is heavily involved in running the Zoo’s Botanical Garden educational programs, various plant trialing programs, and the Plant for Pollinators Challenge. Scott has published hundreds of articles and columns in several publications. Currently, he is a Partner in the Garden Rant blogsite and posts regularly. Scott also authors the Deep Roots and Garden Views columns for *Horticulture Magazine*.

Eva Monheim “Shrubs and Hedges”

Eva is an award-winning educator, Eva teaches Landscape Management at The Barnes Arboretum at St. Joseph’s University in Philadelphia and is a faculty member at Longwood Gardens in Kennett Square, Pennsylvania for the Professional Horticulture Program. Professionally trained, Monheim holds degrees from the Pennsylvania State University in horticulture and art, and from Arcadia University with a master’s degree in English literature. She is the author of *Shrubs & Hedges: Discover, Grow, and Care for the World's Most Popular Plants* a book that was inspired by her years of teaching woody plants as an assistant professor at Temple University in the department of landscape architecture and horticulture.

Manor View Farm & The Perennial Farm are pleased to announce our 23rd Annual Education Seminar
A Virtual Experience
\$40.00

Kathy Jentz “Small Space Garden Design - Squeezing it all into your landscape”

Kathy Jentz is Editor, Publisher and Founder of *Washington Gardener Magazine*. She speaks on gardening and has been honored to have presented programs at Thomas Jefferson's Monticello, the Philadelphia Flower Show, and the Historic Society of Washington, DC.

The Presentations

ZOOM Hosted by:

Eva Monheim **“Shrubs and Hedges”**

Shrubs and hedges are the subject of Eva's latest book. She will explore a vast array of topics including a brief history of shrubs, how they are

named, what makes a shrub dependable, the differences between hedges and hedgerows and why these two forms of landscaping are important for habitat and humans, attracting pollinators and other wildlife, and shrubs for riparian areas and rain gardens. A book signing will follow.

Scott Beuerlein **“Making Landscapes that Matter”**

This talk uses natural history, art, religion, genetics, and other elements of human history and nature to argue that the human

race is naturally predisposed to feeling most happy, secure, and comfortable in savanna-like landscapes. Then, with this in mind and using examples, it continues by discussing how we can include in our designs certain elements that will (often at a subconscious level) create gardens that raise our quality of life. As such, these gardens also ensure a greater appreciation for gardens and greater engagement with them, which could/should result in the many more and better landscapes we truly need in our communities of the future. This talk is different. It certainly strays off the beaten path but it eventually lands close to home and connects a lot of dots that most folks have never connected before.

**Manor View Farm
& The Perennial Farm**
are pleased to announce our
**23rd Annual
Education Seminar**

A Virtual Experience

\$40.00

Kathy Jentz **“Small Space Garden Design - Squeezing it all into your landscape”**

Using examples from area gardens, Kathy Jentz, will illustrate basic design principles for maximizing garden space. Kathy will address common small-space challenges such as creating privacy and adding light to shady areas. She'll offer low-or-no-budget solutions
