

ADOPTION MOSAIC

CONSCIOUS ADOPTION: THE PATH TO NOW

Most adoptive parents have not been modeled how to successfully talk about the various circumstances that led them to adopt. For some parents, this may place them in uncharted territory. Every child deserves to know their origin story and why they came to be part of their adoptive family. This course will help you build your child's legacy within your family structure.

- **create space for parents to practice talking about their decision to adopt**
- **integrate their adoption story into the family story**
- **dig beneath the surface of the common adoption narrative**

This curriculum has been developed by both an adoptee (Astrid Castro, Director and Founder of Adoption Mosaic) and an adoptive parent (Sujata Soni Wipper, School Psychologist). Our aim is to serve kids and parents in the spirit of openness and understanding.
