

## **White Line Woodblock Printmaking and Beyond**

### **SUPPLY LIST**

**Kate Hanlon: [khanlon57@gmail.com](mailto:khanlon57@gmail.com)**

#### **Wood**

There are several options for wood:

Shina plywood; my favorite, and the easiest to use. McClain's Printmaking Supplies;  
[www.imcclains.com](http://www.imcclains.com)

Clear pine; Home Depot sells by the board, 10" or 12" wide. They'll cut it down to whatever lengths you like in store, no less than 12" though. The traditional favorite.

12" square 1/4" Plywood squares: "Craft Plywood," Artist and Craftsman, model making section of the store. I use these frequently.

Luan plywood works well, too, available at any local lumberyard or Home Depot. It has a "seedy" grain.

#### **Woodblock Cutting Tools**

You may want to pick up a set of woodcutting tools that includes a V gouge, a U gouge, knife, etc., but at minimum, a V gouge is necessary. Don't buy linoleum cutters for this purpose; they won't hold up to wood.

McClain's: [imcclains.com](http://imcclains.com). All different levels of quality from student to professional.

Amazon: sells a 5-piece Power Grip set for around \$19.50 that would be fine, as well as lots of others.

Flexcraft is a good brand.

#### **Paper**

Washi (Japanese woodblock printing paper) many different kinds! Experiment to see what you like. I like a heavier weight sheet, 90-140grams, but there are many thinner sheets that hold up well. Masa is one. I will have available a nice quality washi sheet that students may purchase from me at cost. I have not printed recently on western-style cotton papers such as Rives BFK, etc. but these may work, as well.

Artist and Craftsman-in store, not yet online.

McClains; [www.imcclains.com](http://www.imcclains.com)

### **Akua Liquid Pigment Water-Based Inks**

For this class, I suggest students purchase a warm and a cool blue, warm and cool red, and warm and cool yellow, plus white and black. I have also used regular Windsor and Newton tube watercolors with success, but the Akua Liquid Pigments are ideally suited for white line.

(Ultramarine Blue, Pthalo Blue, Scarlet, Quinacridone Red, Yellow Ocher, Hansa Yellow, Jet Black, White.) [www.akuainks.com](http://www.akuainks.com), also:

### **Printing Baren**

Speedball makes an inexpensive, serviceable plastic one. I also like the inexpensive, bamboo-covered ones available at any well-stocked art supply store. Many professional-level ones are available at rapidly ascending price points, but either of these will get you through just fine. In a pinch, I have also used a wooden spoon, metal soup spoon, or a smooth doorknob.
