SACRAMENTO, CA

The Road to Competition

Competition is FUN, as all golf should be, so what's holding you back?

The objective of this session is to demystify the competition experience to help lessen your apprehension and concerns with competitive golf. We've designed this session to be more of a guided, casual conversation with Sacramento Chapter members who have competed in local, regional and national tournaments. As you will discover at this session, competition is inclusive of all skill and handicap levels.

Topics will include:

- the role of handicaps in competition
- how to prepare for competition
- how maintaining pace of play actually helps you play better (identification of time wasters and techniques to speed play)
- etiquette in competitive events
- financial commitments
- player expectations from the moment you arrive to the course to the competition's final day

Don't let your fears keep you from the many opportunities to play competitive golf. Those butterflies are not anxiety, it's anticipation of the fun to come.
