CCCIA June Newsletter

Marty McClain, EnviroStruct LLC
2019 CCCIA President

Welcome to almost Summer, Rainy Season and the Summer Heat. Please remember all three bring with it several risks moreover heat fatigue and lightning. Please take time to make sure that your field personnel remain hydrated and fully understand that lightning can strike for miles ahead and after a storm.

We had another fantastic SOLD OUT Dinner Meeting in May. Our guest speaker was Ricardo Noguera Cape Corals new Economic Development Manager. This was our first opportunity to get first-hand the big picture for the cities fast paced continued growth. He gave a detailed presentation on where he felt the City needs to be and the steps we need to take to get there. There was a great Q&A session from the members after the presentation and we thank Ricardo for his time to come out and speak.

Reminder: we are on our summer schedule with several exciting events for June and July and will resume regular Dinner Meeting starting in August. Please go to cccia.org for more details or contact Bill at the office and he can put you in the right direction.

We are continuing to receive very good support from Steve Poposki our Interim Cape Coral Building Official and the cities building department. The building departments new software install is moving at full speed and many of us are already seeing improvements. The Cities newly implemented QLess System has already made waiting at the counter an easier task and has allowed for all of us to plan our day better when having to go to the City. We will keep all advised as to the install progress and uses.

Brief update regarding the Paving Restoration plan, your CCCIA Paving Taskforce is still working with the City on best practices when dealing with this issue. We are hopeful to reaching a conclusion very soon with this issue and moving on.

Best Regards
