

ROBERT M. BEREN ACADEMY

FULL STEAM AHEAD

MATCHING CHALLENGE GRANT

Growing into Our Future

Full STEAM ahead: We are laser focused on science, technology, engineering, art, and mathematics at Robert M. Beren Academy. The focus of our grant is Jewish education sustainability. We recently launched an exciting tuition initiative, locking tuition rates until 2023 to help address Jewish day school affordability. As ever, we need your help in providing our students the best programs and learning opportunities.

RMBA is a Modern Orthodox day school that adheres to standards of academic excellence and exemplary moral conduct as it prepares its students to become self confident, compassionate, practicing Jews as well as committed citizens and life-long learners.

About the grant:

Our goal is to raise \$750,000 to provide the tools our students need to learn and thrive in the world in which they currently live and for their futures. We are excited to have a matching grant made possible by an anonymous foundation. All donations received through September 2021 will be matched 1:2.

"Technology is the pen and paper of our time. It is the lens through which we experience much of our world"

- David Warlick

"Technology in the hands of great teachers can be transformational"

LEO TOLSTOY

Labs

We will enhance the makerspace for students Kindergarten through 12th grade and upgrade the STEAM lab for our younger learners. The advancements will strengthen our academic program and provide our students competitive learning opportunities.

Tech & Tablets

To achieve our goal we will move to a 1-to-1 student-tablet ratio in our middle and high school. Our younger students will greatly benefit from a new technology curriculum.

Professional Development

We will ensure that our teachers are able to use these new tools in the most effective ways in order to ensure the best learning outcomes for our students.

We will provide our students an enhanced way of interacting during the learning process via technology. This allows us to create custom learning experiences for our students so that we can better prepare them.

Introducing technology and STEAM into our curriculum in a compelling manner will enable us to recruit and retain additional students, helping RMBA be sustainable for decades to come.

In our current makerspace, students enjoy a variety of tools that teach them design thinking and problem solving, math and science skills and applications, engineering and design, as well as important life skills. We have barely scratched the surface and would love to be able to offer so much more. By introducing and incorporating new tools into the curriculum, students will have the opportunity to be more actively involved in the learning experience.

THE RMBA DIFFERENCE

Robert M. Beren Academy has an unwavering commitment to academic excellence and a life-long love of learning. Our approach is all encompassing.

On any given day, you may see students across our 52 acre campus collaborating with each other and forming intergrade connections, volunteering with the elderly, rehearsing for a school performance, preparing for an academic fair or competition, and exemplifying menschlichkeit, humanity, respect, and dignity.

RMBA students develop a spirit of excellence that is the hallmark of our integrated education, commitment to Torah, and our love for Israel.

Robert M. Beren Academy graduates become leaders in the Jewish community and strive to make the world a better place. Our faculty and administration lead by example.
