

Help us improve wayfinding signs in Torrance!

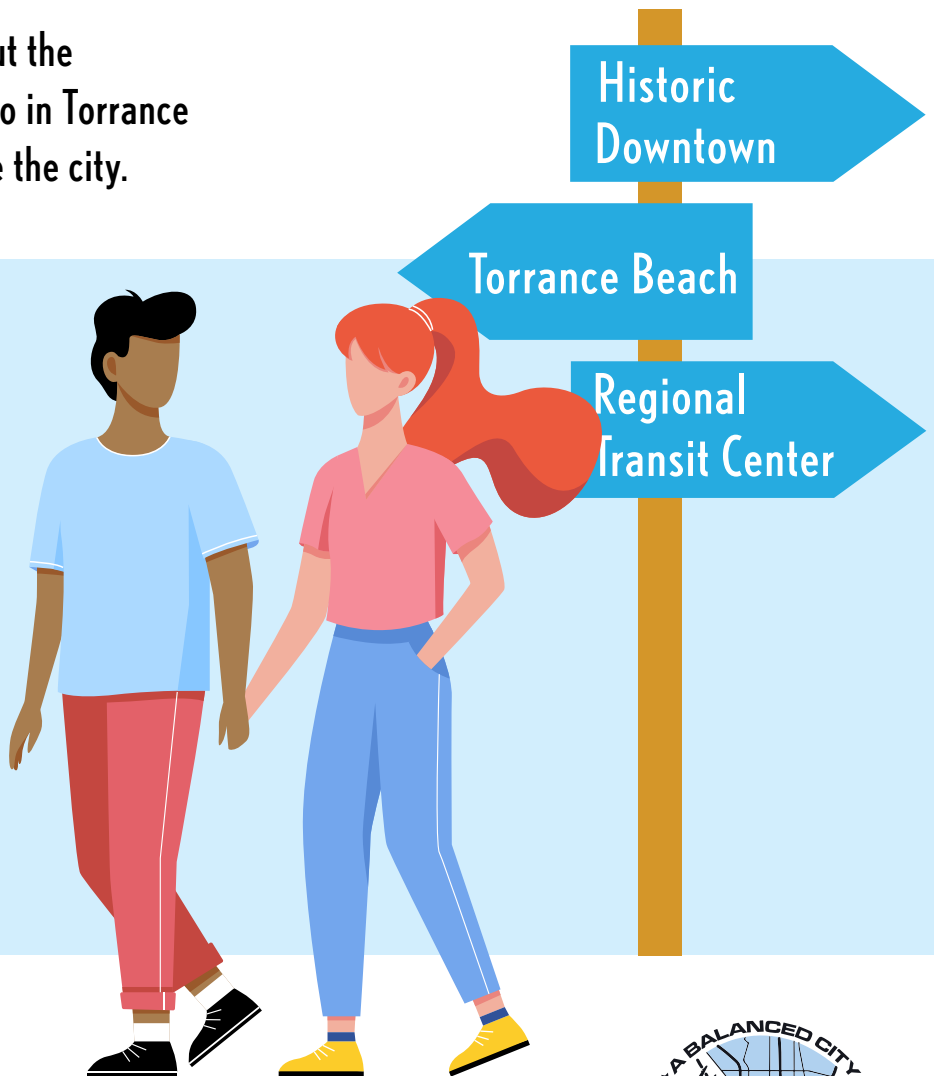

The City of Torrance is launching a Citywide Wayfinding and Signage Plan and we need you!

Visit the project website and check out the interactive map to tell us where you go in Torrance and help us make it easier to navigate the city.

Why do we need wayfinding?

Wayfinding signage is placed in public places to help people safely and conveniently find their way to where they need to go. You may have seen wayfinding signage near popular visitor destinations, in downtown areas, or even in the airport or at the mall. Wayfinding signage is especially important for those traveling on foot, by bicycle, or on transit.
