

THE LATEST IN THE CLASSROOM

The **Foundations Art Studio** students have been busy! Students recently created winter scenes inside glass jars (pictured on left). They had fantastic solutions! The jar on the left was created by **Akim Joseph '21** and on the right by **Noelle Prophet '23**.

The Eiffel Tower is one of the most renowned landmarks in the world and has been the inspiration for the creation of many replicas ... including those made by the **ND French Club**. After a brief video that gave all the specifics of the 1,064 foot and 10,100 ton structure, club members got to work to create their own reproductions! The results ... iconic!

Students in **Ms. Longo's Algebra II** classes used the quadratic formula to find the distance a beanbag would travel. They then played a mini beanbag game using their findings. Math can be fun!

Students participating in our Introduction to Graphic Design course used Photoshop and a web based program called Pixlr to create pop culture images. The work shown here was created by **Teyvah Puttasodd '23** and **Sheila Hagerty '23** respectively.
