Your child's art is your most valuable art.

Using the ancient techniques of encaustics -- bees wax, tree resin, heat -- I work with all kinds of paintings, drawings or doodles to transform your family masterpiece into fine art for your home.

Everything looks polished and elegant when played with under layers of bee's wax. Let's explore what we can do with your little artists work.

I promise, it will be the most meaningful piece you will hang in your home.
