Who We Are

Boundless Health is the newest addition to the Boundless family – created specifically to meet the primary and preventive healthcare needs of individuals and families with intellectual and developmental disabilities (I/DD) and behavioral health challenges such as autism.

We understand the challenges our patients have in accessing necessary care, and provide a safe, welcoming space to accommodate their individualized needs. We support our patients and families in ways traditional healthcare providers cannot, offering multiple services in a single location, same-day appointments, virtual video visits, extended office hours, and 24/7 access to primary care for urgent concerns.

Providing person-centered health care.

- Counseling for mental health conditions and other behavioral health concerns that benefit from one-to-one therapy
- Speech and language evaluations and treatment including one-to-one therapy and help with communication assistive devices

The Right Clinician For You

At Boundless Health, you can select one of our medical providers to be your primary care provider. However, if you are satisfied with your current doctor, you are welcome to continue to see them and to use Boundless Health for any unmet needs like dental or behavioral health services.

While our healthcare providers are specifically trained to serve individuals and families with I/DD or other complex needs, our health center is open to everyone.

Getting Started

You can call our office or email us to schedule an office visit. An intake counselor will answer your questions and guide you through what to expect at your first appointment.
