

# Renovation of Serabu Community Hospital

## Background to the project

In March 2017, a team of guests from HealeyIRF, including President Robert Healey Jr., visited Serabu Hospital, in Bo District, to learn first-hand the struggles and challenges this facility faces. Amongst other things, the need to renovate the already worn out buildings was identified as a priority and HealeyIRF committed to giving the hospital a facelift. A total of seventeen structures were renovated both inside and outside
