Do you care about the environment and want to help out more at home? Did you know that, outside of agricultural systems, approximately 80-95% of the plant species found in natural habitats require insect or animal-mediated pollination?

Join us as we learn from local environmental professionals about various topics and what you can do to help. Any and all ages welcome!

Promoting Healthy, Active Lifestyles
Pruning Like a Pro
Practicing proper pruning techniques is an excellent way to protect your trees and your property against future hazards. But how do you determine which branches should be cut? When should trees be pruned? Why is it important and what tools are required? The City of Novi’s own forester will lead you through each of these questions and more while also discussing the City’s maintenance of more than 37,500 city-owned trees.

Solar Panels – How Can They Benefit You?
Solar is one of 4 market disruptions that are changing our world. Join us for a talk to learn more about solar panels and how they can benefit the homeowner or business owner.

Chasing Coral
This film explores and explains why coral reefs around the world are vanishing at an unprecedented rate. A team of divers, photographers and scientists set out on a thrilling ocean adventure to discover why and to reveal the underwater mystery to the world.

Home Energy Efficiency
The City of Novi, will host a workshop presented by Brandon McCullough (Facilities Manager – City of Novi) that offers information and tips for homeowners to learn the best practices for maintaining energy efficient homes. During the workshops, people will learn:

- The benefits of energy efficiency existing homes
- Ways to improve energy performance in your home
- Healthy material choices for new and retrofit projects
And much more!

Community Cats – Where They Came From and How You Can Help Using the TNR Process
Please join us on March 4 to learn about community cats and what you can do to help them in your own neighborhood. TNR (Trap, Neuter, Return) is the only humane, cost effective and proven way to reduce suffering among outdoor cats. This interactive talk will touch on this process while providing an interesting and entertaining look at cats and their quirky ways.

Novi Nature at Night: All About Bats
Are you batty about Michigan’s most misunderstood nocturnal wildlife? Learn all about our nine species of bats, the threats they’re facing, how their populations are being managed throughout the Great Lakes region, and how you can participate in bat-related citizen science projects. We’ll cover everything from bat houses to bat calls in celebration of our only flying mammals.
