

MFR Welcomes Economic Development Staff

Lancaster and Fairfield County economic development staff recently visited MFR following the company's opening in the Rock Mill Industrial Park. The team saw firsthand how MFR's recommerce model helps retailers quickly convert returned goods back into revenue. By receiving, cleaning, repackaging, and shipping items within just two days, MFR enables products to be resold in-season at full price, saving clients both time and cost compared to traditional returns processing. The company continues to rebuild momentum with a growing client base and 28 employees and is planning for future investment.
