

eReaderTM + Drug Screening System

INSTRUMENTED POINT OF COLLECTION
TESTING FOR A DRUG-SAFE WORKPLACE

THE IMPORTANCE OF WORKPLACE DRUG SCREENING

BUILDING AN EMPLOYEE COMMUNITY THAT DRIVES SUCCESS FOR YOUR ORGANIZATION.

Having a safe and physically able workforce is an essential part of your workplace health.

According to figures released by the National Council on Alcoholism and Drug Dependence (NCADD), drug abuse costs employers upwards of \$81 billion each year.¹

These monetary losses are due to high turnover rates, reductions in productivity, workplace theft, higher absenteeism, more sick time use, and a lower quality of work.

Being drug-safe is putting reliable substance abuse testing services in place that help you achieve a safe, healthy, productive and admired workplace.

**A NETWORKED SOLUTION THAT
SUPPORTS YOUR DRUG-SAFE WORKPLACE.**

eReader+ Drug Screening Solution

**THE NEXT GENERATION OF RAPID,
INSTRUMENT-READ, EXPANDED PANEL TEST
FOR TODAY'S RELEVANT DRUGS OF ABUSE.**

Your drug screening program should be testing for today's most relevant drugs of abuse. Prescription drug abuse has been referred to as an epidemic by the Centers for Disease Control and Prevention², yet frequently abused drugs like oxycodone are not targeted in common drug screen panels.

The eReader+ instrument with the eCupTM+ device is a next generation screening solution designed for the detection of today's most common illicit and prescription drugs. Our solution is available throughout the eScreen Occupational Health Network (EOHN) and provides you with the answers you need when and where you need them.

KEY FEATURES

FEATURES THAT SUPPORT YOUR DRUG-SAFE ENVIRONMENT

SPEED

Results in as little as 3 minutes—

The eReader+ system dramatically affects time to hire by reducing turn-around time for negative results from days after collection to only 3 minutes. Our system reports results immediately and securely to the employer via the MyeScreen® web application or through one of our standard interfaces with leading applicant tracking systems and HR solutions.

INNOVATIVE TECHNOLOGY

Instrumented interpretation—Remove the subjectivity of human-read results. Our innovative technology will test, read, and report results maintaining confidentiality, precision, and consistency.

COMPREHENSIVE ANSWERS

Complete visibility for results reporting and laboratory confirmation—Negative results are reported electronically in as little as 3 minutes. Non-negative samples are sent to the laboratory for confirmatory testing, and then on to an independent medical review officer (MRO) for final determination. Real-time status updates are reported electronically throughout the testing process, giving visibility to the actions being taken for each employee or candidate.

FLEXIBILITY

Flexible panels to meet your needs—

The eReader+ system with the eCup+ device enables you to customize and choose from extensive panel options that test for up to thirteen drug classes based on your needs and policies.

CONVENIENCE

Convenient screening locations—

The eReader+ system is available nationally through the expansive EOHN™ eScreen occupational health network with new sites being added every week.

PANEL FLEXIBILITY WITH 13 DRUGS

USE AVAILABLE PANEL COMBINATIONS OR CREATE YOUR OWN

TEST	ABBREVIATION	CALIBRATOR
Amphetamine	AMP	d-amphetamine
Methamphetamine	MET	d-methamphetamine
Methylenedioxymethamphetamine	MDMA	3,4-Methylenedioxymethamphetamine (Ecstasy)
