SPECIAL PROCEDURES CONCERNING MEETINGS

Meeting by Electronic Means: The leadership of the church may conduct a business, committee or council meeting by telephone conference call or other electronic means when for reasons beyond their control they may be unable to conduct an in person meeting. Leadership should assure that a representative number of members will be able to be involved in the electronic meeting. The church may waive a quorum if a meeting must be conducted in this manner. The meeting should be scheduled and held in a manner that will allow as many members to participate as possible and be able to see and or hear each other. This option should be used only in a situation where the church cannot meet in person.
