

# KS COVID-19 Online Reporting Portal

## User Guide

---

May 4, 2020

### Background

On May 4, 2020, the Kansas Department of Health and Environment Bureau of Epidemiology and Public Health Informatics (KDHE) introduced an online reporting portal for healthcare providers to report suspect and confirmed cases of coronavirus disease 2019 (COVID-19). The reporting portal enables providers to securely and confidentially submit patient information and pending laboratory testing without the need of printing records, completing a handwritten disease report form, and faxing documents to KDHE. In addition, the online portal allows providers to review records submitted for tracking purposes. The online portal is seamlessly integrated into KDHE's disease surveillance system, EpiTrax, allowing public health officials to respond faster to implement containment measures without waiting for manual data entry of faxed documents. Submitting reports through the online portal fulfills reporting of COVID-19 as required by Kansas regulation [K.A.R. 28-1-2](#). Future upgrades are planned to improve the functionality of the online reporting portal. Access or enroll by visiting <https://diseasereporting.kdhe.ks.gov/>.
