RE: Infectious Disease Preparedness 2026 ECHO: Game Plan for Health! Readiness for Tournament Games in Kansas City

Is your team ready for global soccer matches to kick off in Kansas City in 2026? Join this Infectious Disease Preparedness 2026 ECHO series to equip your team with the tools to address domestic and international travel-associated disease risks. Symptoms, screening, testing and management of travel-associated infectious diseases will be discussed along with practical strategies for preventing and controlling infection spread.

Tuesdays: Jan. 13 – Feb. 10, 2026 | Noon - 1 p.m. CST via Zoom

Series Topics to Include:

- Vector-borne diseases
- Diarrheal diseases and viral hemorrhagic fever
- Rash illnesses
- Respiratory infections
- Foodborne and waterborne illnesses

Continuing Education:

- This series will be offering no-cost continuing education credit for physicians, advanced practice clinicians, nurses and pharmacists.

This series is designed for emergency department clinicians, public health professionals, urgent care providers, pharmacists, medical residents and nurses.
