

# Infections can be harmful in nursing homes.

Solid infection prevention practices,  
coupled with the COVID-19 vaccine,  
are **essential** to protecting those  
who live and work here.

**Staff, Visitors, Residents:** Learn how to prevent infections! We have reliable, current information available at your fingertips. Use the QR code or link below to visit these fun, brief learning modules that review the dangers of infections and how to prevent them, including the importance of being vaccinated.
