Enroll in EFT to streamline your payments without fees

Kansas | Healthy Blue | Medicaid

Adopting electronic funds transfer (EFT) simplifies healthcare payment processing and enhances financial management for your office.

EFT allows for the direct transmission of payments into your account through the automated clearinghouse network at no cost. Each deposit is assigned a trace number (TRN), making it easier to reconcile payments with the corresponding 835 electronic remittance advice (ERA). Please note, we only use the banking information provided to deposit funds, ensuring your security.

Enrollment process

To enroll in EFT, visit [EnrollSafe.PayeeHub.org](https://enrollsafe.payeehub.org). You can use the [EnrollSafe User Reference Manual](#) for detailed instructions.

Important note: If you receive other payors' payments through Zelis, you will still need to complete the 2-step enrollment process to avoid EFT fees.
