

## April 2024 Reflections

Just a note that I learned from the LTC National Infection Prevention Forum: “Please make sure that if a resident is receiving any type of prophylactic ABT treatment that they are being followed by a specialist. For example: a resident on a prophylaxis for chronic UTIs should be seen by a urologist and that there is clear documentation as to why the prophylactic is ordered. We try to get any resident on a prophylactic in at least quarterly to their specialist to deem appropriateness. We (the writer) were cited in a facility for failure to follow up with a specialist for a resident on a prophylactic ABT for chronic UTIs.” A response entry stated, “We have seen them tag this under F 757 Drug Regimen Free from Unnecessary Drugs. They wanted a duration along with supporting documentation for clinical use.”

With the initiation of Enhanced Barrier Precautions, CMS took the opportunity to update multiple Critical Element Pathways including: Infection Control; Urinary Catheters/UTI; Dental; Dialysis; Respiratory & Trach Care & Tube Feedings. If you are using the Pathways for QAPI or mock surveys, you may want to update your files. They are very helpful tools for survey compliance and for improving quality care for your residents.

As you may know by now, surveyors are looking hard at vaccinations, especially the new COVID booster and PCV20. In the first April Weekly Clinical Update I referenced the CDC app to assist facilities to determine required/recommended vaccines. It's easy to use and is very valuable to Infection Preventionists. <https://www.cdc.gov/vaccines/schedules/hcp/schedule-app.html#download>. If you are working with the QIO, you may have the opportunity to have the QIO's help in setting up clinics for all of the vaccines including pneumonia and COVID boosters. They also work on flu vaccine clinics but we are now out of the flu season, so you may decide to wait for the fall season. In addition to facilities currently working with the QIO, the QIO is also sending targeted emails to homes who have low PNE vaccine rates. Here is a copy of the letter from KFMC on how you can use their resources to ensure your immunization program meets regulations and “best practice”.

### **Want to Improve Your Facility Vaccination Rates?**

#### **KFMC, a member of HQIN, Can Help!**

Vaccines protect us all from illness and disease, but they are especially critical for our most vulnerable populations. Particularly, the COVID-19 vaccine provides increased protection to adults ages 65 years and older.

In our continued effort to support the health and well-being of older adults, KFMC Health Improvement Partners, a member of the Health Quality Innovation Network (HQIN), provides FREE vaccination clinic support to Kansas nursing homes, through a partnership with [CPESN-USA](#), a clinically integrated network of community-based pharmacies.

Our team of experts can assist you in securing vaccine doses and coordinating healthcare professionals to immunize and provide vaccine education to residents and staff. In addition to COVID-19 vaccines for your residents, support is also available for influenza and pneumococcal vaccines. This program can also provide the COVID-19 vaccination to your staff.

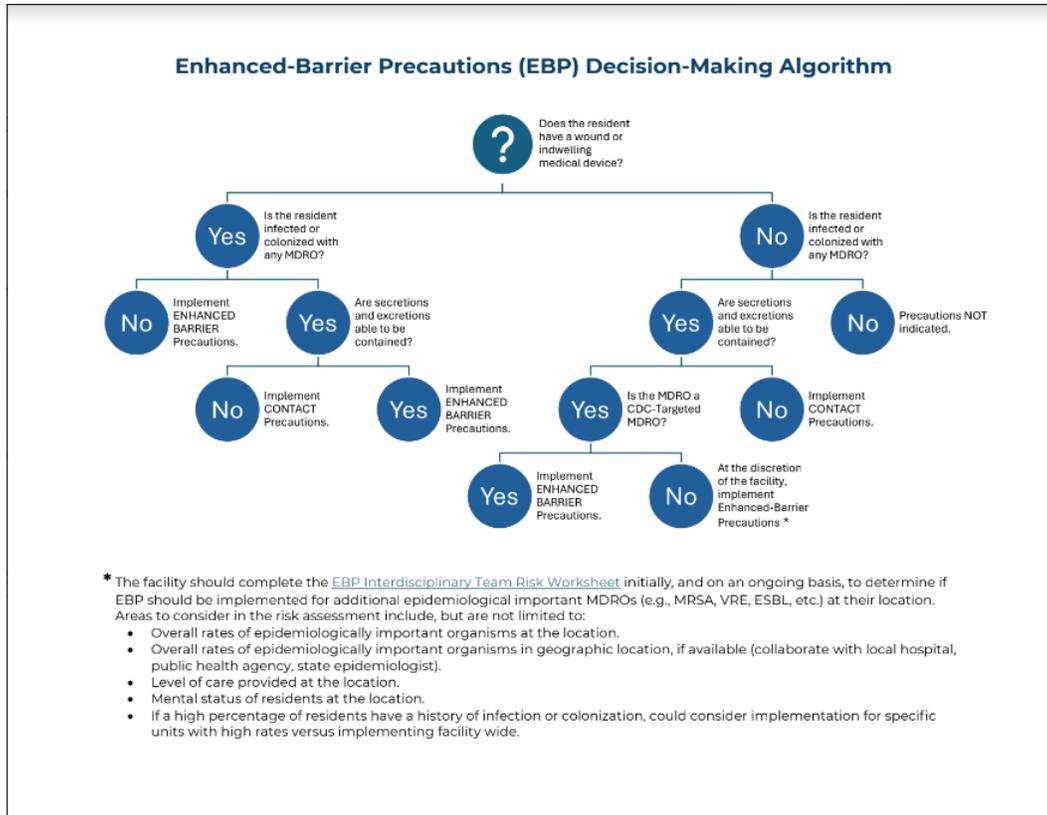

In addition to onsite vaccine clinic support, our team also partnered with Immunize Kansas Coalition [Home | IKC \(immunizekansascalition.org\)](#). Through this partnership, we can provide certain teams with a Certified Community Health Specialist. They CHS are embedded, and live, within their assigned counties and know their community members. The CHS can serve as a trusted messenger meeting people “where they are” and providing education in a variety of meaningful ways.

If you are interested in utilizing the Mobile Vaccine program or want to discuss the program and the Community Health Specialist, please let the KFMC team know.

You can reach us at  
Kim Byers, [kbyers@kfmc.org](mailto:kbyers@kfmc.org)  
Brenda Groves, [bgroves@kfmc.org](mailto:bgroves@kfmc.org)

If you are ready to request a vaccine clinic, and do NOT need a Community Health Specialist, you can email us to request or simply complete the [Nursing Home COVID-19 Vaccine Clinic Support Request Form](#) to start the process today!

On a recent Administrator Forum, the following, unprotected documented was provided to staff to determine EBP: It appears to be helpful. Use it if your Infection Control Committee approves and as you choose.

### Enhanced-Barrier Precautions (EBP) Decision-Making Algorithm

#### Definitions

##### CDC Targeted MDROs

- Pan-resistant organisms;
- Carbapenemase-producing carbapenem-resistant Enterobacterales;
- Carbapenemase-producing carbapenem-resistant Pseudomonas spp.;
- Carbapenemase-producing carbapenem-resistant Acinetobacter baumannii; and
- Candida auris.

##### Epidemiologically Important MDROs include, but are not limited to:

- Methicillin-resistant Staphylococcus aureus (MRSA);
- ESBL-producing Enterobacterales;
- Vancomycin-resistant Enterococci (VRE);
- Multidrug-resistant Pseudomonas aeruginosa; and
- Drug-resistant Streptococcus pneumoniae.

##### Wound

Chronic wounds include, but are not limited to, pressure ulcers, diabetic foot ulcers, unhealed/dehisced surgical wound and venous stasis ulcers. Superficial wounds such as skin tear or skin breaks covered with a Band-Aid are not an indication for EBP.

##### Indwelling Medical Device

Central lines, PICC lines, urinary catheter, feeding tubes and tracheostomies. A peripheral IV is not an indication for EBP.

AHCA has sent out some direction related to NHSN citations issued despite closure of the facility. Here is the guidance they sent to us:

During the first quarter of 2024, discussion with state affiliates regarding NHSN citation revealed that several facilities continued to receive citations despite closures. AHCA reached out to the CDC to verify what actions need to be taken to avoid citations when a facility closes. Here are the directions provided by the CDC:

- Facilities should contact CMS to inform them about any type of closure.
  - **Facilities are expected to report until they receive an official notice of termination from CMS.** Until the official notice of termination is received from CMS, the facility should continue to enter data (such as zeros) in NHSN.
- After this notice is received, the facility can be placed in a "Withdrawal Pending" status in NHSN (if it is closing).
  - In order to withdraw their facility, they would deactivate every active component within the facility, and this will automatically put the facility into "Withdraw Pending" status for 364 days.
  - On day 365 the facility will be completely withdrawn. The facility should also leave any groups they may be a part of prior to withdrawing.
  - Once logged into NHSN, on the left navigation pane, select Facility>Facility Info and deactivate the components.
  - Once withdrawn, the facility will no longer be accessible after this is complete, so any data reports should be run prior if you want to retain data information.
