

Now Is the Time: How to Increase the Public Value of Scientific Research

Arthur Lupia, Ph.D.

**2 - 3:30 p.m.
Monday
March 9, 2020
Meacham Auditorium
OMU**

Arthur Lupia is assistant director of the National Science Foundation and head of the NSF Directorate for Social, Behavioral, and Economic Sciences.

SBE supports basic research on people and society. The SBE sciences focus on human behavior and social organizations, and how social, economic, political, cultural and environmental forces affect the lives of people from birth to old age and how people, in turn, shape those forces.

SBE provides about 68% of federal funding for social, behavioral and economic sciences basic research at academic institutions. Through its various core disciplinary and interdisciplinary programs, as well as contributions to cross-directorate NSF investments, SBE supports approximately 5,000 scientists, educators and students in a typical year.
