

CHHE Zebrafish Interest Group
Trainee Work-In-Progress Seminar
May 11, 2018, 1 – 4 PM
Toxicology Building Auditorium

Join us for a series of graduate student work-in-progress presentations from the Kullman, Mattingly, Planchart, Shive, and Yoder labs. Topics will include:

Effects of GenX on human bone-derived mesenchymal stem cells

Telomere maintenance in zebrafish cancers

Understanding the link between vitamin D deficiency and obesity

Investigating the effects of PAHs on glucose metabolism in leukocytes

...and more!

Please join us for this great opportunity to learn more about emerging research projects in the NCSU CHHE community!
