

Vaccine and Mask Requirements at County Facilities

Mask Requirements

Beginning Thursday, August 5, employees and members of the general public at county-owned buildings will be required to wear a mask indoors.

The CDC's guidance for vaccinated individuals was recently updated and now advises masking indoors for vaccinated individuals in areas with substantial transmission. Anne Arundel County passed the threshold for substantial transmission on Thursday, July 29.

Those that are unwilling to mask inside of our buildings will be politely escorted out. For county employees that are unwilling to wear a mask to protect their co-workers, progressive discipline will be implemented, up to and including suspension without pay.

Vaccine Requirements

Beginning Monday, September 13, employees who have not been vaccinated will be required to show proof of a negative COVID test once per week to their supervisor in order to report to work. Unvaccinated employees that are unwilling to get tested weekly will be subject to progressive discipline, up to and including suspension without pay.

GET VACCINATED: Our Department of Health's testing and vaccination clinics are free of charge. Additional pop up clinics conveniently located for county employees will be available throughout August and September.

Visit aacounty.org/covidvax or call 410-222-7256 to get vaccinated today.

Visit aahealth.org/covid19-testing to get a COVID-19 test.
