

Did you know?

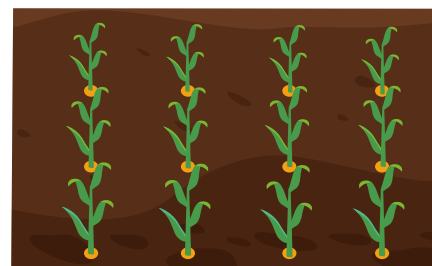

Seed treatments reduce soil surface exposure of crop protection products by up to 99.5%¹

**Whole-field treatment
(spray)
10,000 m²**

**In-furrow treatment
(granules)
500 m²**

**Seed treatment
50 m²**

99.5% less
soil surface exposure vs.
whole-field treatment

90% less
soil surface exposure vs.
in-furrow treatment
