## **FROM CORTEVA AGRISCIENCE**

## Protect Enlist E3<sup>®</sup> Soybean Acres with Enlist One<sup>®</sup> and Enversa<sup>™</sup> Herbicides

Enversa<sup>™</sup> herbicide will be the preferred residual tank-mix partner of choice with Enlist One<sup>®</sup> herbicide for Enlist E3<sup>®</sup> soybeans pending registration from the U.S. Environmental Protection Agency (EPA).

In addition to having compatibility with Enlist One herbicide, Enversa herbicide will offer soybean growers multiple benefits:

- Powerful weed control contains encapsulated acetochlor, a Group 15 mode of action.
  Group 15 herbicides are effective for mitigating weed resistance and controlling glyphosate- and ALS-resistant weed varieties.
- Excellent crop safety will offer excellent crop safety for reduced crop response, especially compared with competitors like S-metolachlor products.
- **Extended residual activity** drives to the soil to create a residual barrier that can provide up to four weeks of residual weed control activity.
- Application flexibility will offer a flexible solution with preemergence and postemergence application options, allowing flexibility with challenging weather conditions. Additionally, Enversa herbicide requires only 0.5 inch of moisture to activate, making it a good choice in drier climates.
- Tank-mix compatibility will be a good addition to a program approach to weed control with multiple other soybean herbicides, including Sonic<sup>®</sup> and Trivence<sup>®</sup> herbicides.
- A convenient label in addition to soybeans, Enversa herbicide will be labeled for a variety of crops, including corn. This will offer the convenience of using this herbicide for multiple products, eliminating concerns about plant-back restrictions between different crops.

Enlist One® COLEX-D° technology

## HERBICIDE

Enversa herbicide is expected to be available in 2024. You can learn more by visiting Corteva.us/Enversa.

Watch this video to hear Jeff Moon, Market Development Specialist, Corteva Agriscience, and Tony Goede, Enlist Field Specialist, Corteva Agriscience, talk about the benefits that Enversa herbicide can bring to your fields.

" <sup>®</sup> Trademarks of Corteva Agriscience and its affiliated companies. The transgenic soybean event in Enlist E3<sup>®</sup> soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies L.L.C. Enlist Duo<sup>®</sup> and Enlist One<sup>®</sup> herbicides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist Duo and Enlist One herbicides are the only 2,4-D products authorized for use with Enlist<sup>®</sup> crops. Consult Enlist herbicide labels for weed species controlled. Sonic<sup>®</sup> and Trivence<sup>®</sup> are not registered for sale or use in all states. Contact your state pesticide regulatory agency to see if a product is registered for sale or use in your area. Enlist<sup>®</sup> and Trivence<sup>®</sup> are not registered for sale or use in during the pesticide regulatory agency to see if a product is registered for sale or use in your state. Enversa<sup>™</sup> has not yet received regulatory approvals; approvals are pending. The information presented here is not an offer for sale. Always read and follow label directions.
