

Resicore® XL herbicide: a flexible, innovative corn solution

Resicore® XL

HERBICIDE

Corteva Agriscience is excited to announce its latest corn herbicide solution: Resicore® XL herbicide planned for launch in 2022 upon U.S. Environmental Protection Agency (EPA) registration. Resicore XL builds on the success and proven weed control that farmers have come to expect from Resicore® herbicide, with enhanced features and benefits. It's one of nine new Corteva Agriscience™ corn herbicide formulations designed to keep up with customers' rapidly changing needs.

Resicore XL features and benefits:

- The widest application window of any Corteva corn herbicide.
- Can be applied preplant, pre- or post-emergence on corn greater than 11 inches tall and application rates are customizable.
- Three proven modes of action help control more than 75 of the toughest broadleaves and grasses.
- Comes equipped with an encapsulated acetochlor to control herbicide release rates and increase crop safety.
- Greater tank-mix capabilities, particularly with micronutrients like UAN & ammonium thiosulfate.
- Ability to add compatible products like atrazine, glyphosate and other corn herbicides for weed management.
