

Natalie Hong, M.S.

Natalie completed her Bachelor of Science degree in Applied Psychology at New York University. She then worked as a research coordinator at the Weill Cornell Medicine Center for Autism and the Developing Brain prior to beginning her doctoral training in the clinical science PhD program at Florida International University. She is currently completing her predoctoral internship training at Morgan Stanley Children's Hospital of New York-Presbyterian/Columbia University Irving Medical Center. Much of her clinical work has focused on the assessment and treatment of early childhood anxiety and behavior problems and providing mental health services in schools and pediatric health settings. Her research has investigated factors associated with treatment nonresponse, as well as examining various sequences of care that can lead to more efficient and effective treatment outcomes for youth and their families.
