

Vantis, North Dakota's Statewide UAS Network,
Hosting Meetings with Local Manned Aviation Pilots

What: Join Vantis for a community discussion - we'd like to learn from pilots in Western North Dakota about typical flight activity, share our plans, and answer any questions. We're seeking community feedback to make the implementation of Vantis as seamless as possible.

When:

Tuesday, February 23rd, 6:30pm - Williston Manned Pilot Meeting

Overland Aviation Hangar - 14151 Commerce Drive, Williston, ND 58801

Wednesday, February 24th, 5:30pm - Watford City Manned Pilot Meeting

Rough Rider Center - 2209 Wolves Den Parkway, Watford City, ND 58854

Who Should Attend: .

The Manned Pilot Meetings are geared towards local manned pilots, though they are open to anyone. Community members are welcome to come learn and ask questions.

Press are welcome at all events - we're happy to speak and answer any questions you may have!

About the Northern Plains UAS Test Site

The [Northern Plains UAS Test Site](#) is one of seven Federal Aviation Administration (FAA) UAS test sites in the nation. The mission of the NPUASTS is to collaborate with FAA and industry partners to develop systems, rules, and procedures to safely integrate unmanned aircraft into the National Airspace System without negatively impacting existing general or commercial aviation.

About Vantis

[Vantis](#) is North Dakota's statewide unmanned aircraft systems (UAS) beyond visual line of sight (BVLOS) network, the first of its kind in the nation. Created by North Dakota with an initial investment in 2019, Vantis provides turnkey support to commercial and public UAS operators through infrastructure and regulatory approvals allowing applications and usability over a variety of industries. Visit VantisUAS.com for more information.
