**City of Williston construction updates**

WILLISTON, N.D. – The following are updates regarding ongoing and upcoming construction projects throughout the City of Williston.

**4<sup>th</sup> Street West**

Construction on 4<sup>th</sup> Street West as part of the 4<sup>th</sup> Street Cultural Corridor project began on July 15 and is scheduled to last until early September, weather depending.

This project consists of the installation of curb bulb outs, trees, and streetlights as well as minor curb, gutter, and sidewalk repairs along 4<sup>th</sup> Street West from Main Street to 2<sup>nd</sup> Avenue West.

The project contractor is Ti-Zack Construction, and the project is primarily funded by two grants from the North Dakota Department of Transportation.

Work began on 2<sup>nd</sup> Avenue West and will continue to 4<sup>th</sup> Street West, starting from the centerline to the sidewalk on the north side first.

Traffic flow restrictions on 4<sup>th</sup> Street West can be expected throughout the duration of the project.

In addition, the parking lot located alongside 4<sup>th</sup> Street West to the south is scheduled to be closed for three weeks beginning the first week of August.

Work will entail resurfacing the parking lot, moving the driveway aprons and drive aisles, installing new lights, and restriping the parking lot.

**2021 Asphalt Treatment and Striping Project**

The 2021 asphalt and striping project is scheduled to start on Monday, July 26 and is part of the City's annual asphalt maintenance and preservation program.

Asphalt sealing is a type of pavement surface treatment and is a fast-moving process.

Property owners are requested to observe and follow the no parking signs placed as part of this

project. As areas are sealed, they will not be available for parking for about an hour. Striping will follow once the seal coat work is complete.

Impacted areas include east of Main Street to University Avenue from 11<sup>th</sup> Street South. University Avenue from 26<sup>th</sup> Street South, and the area between Main Street and 2<sup>nd</sup> Avenue West from West Broadway South will also be included.

The contractors for this project are Asphalt Preservation Co. and Traffic Safety Services and the project is scheduled to last a week.

### **Williston Square**

Work inside Williston Square is ongoing. Sanitary sewer is installed and water and stormwater sewer piping is currently being installed on 3<sup>rd</sup> Avenue West.

Excavation and grading required to build stormwater detention ponds is nearing completion. Once the ponds are complete, work will begin on rough grading various road sections throughout the Square.

BEK Consulting is the contractor and Alliance Consulting is the engineer for this project.

### **Williston West Reservoir and 32<sup>nd</sup> Avenue Watermain Extension Project**

This project consists of the construction of a new 2-million-gallon water reservoir in the northeast corner of the intersection of 32<sup>nd</sup> Avenue West and 42<sup>nd</sup> Street West near the Municipal Golf Course.

Construction is scheduled to be complete November 2021, weather depending.

The new reservoir will be concrete and will have a sledding hill installed on the south/southeast side of the structure. A security fence will be installed around the remaining portions of the tank.

Installation of approximately 1,400 linear feet of 16" PVC watermain pipe has been installed as part of this project to tie the reservoir into the existing City system to the south and expand current water system capacity.

The floor slab and foundation work is complete with work beginning on the installation of the tank walls.

DN Tanks is the contractor for this project.
