

The CHI St. Alexius Health Williston Foundation Charity Ball is Saturday, Sept. 8 at the Well at Williston State College. A spectacular evening is planned for an even greater cause! Doors open at 5 p.m. The Charity Ball will feature live circus entertainment, dinner and dessert, live and silent auctions and a live band and dancing! Formal Attire is requested.

Every year the proceeds benefit the CHI St. Alexius Health Williston patient equipment fund. This year, specifically, the funds will help update the lab equipment and upgrade to digital radiology! Both of these upgrades will have significant benefits to numerous patients in a variety of departments. The lab analyzer identifies blood types of compatible units for patients who need blood without interruptions. This will save time with staff, free up the technicians and create efficiencies for not only ER or surgery patients needing blood but for oncology patients as well. The upgrade to digital radiology will provide immediate and better quality images. This faster and more accurate process will decrease wait times and require less repositioning and inconvenience for patients.
