Topic: Improving Operational Efficiency Due to the Labor Shortage

Want to improve the productivity of your resources including, but not limited to your human capital? Adopting LEAN systems and principles can and will help. LEAN is a thinking culture that utilizes the knowledge of all employees and includes tools and systems that can enhance their abilities to help with your efforts to improve productivity of your resources. A brief overview of such the LEAN tools will be provided by Reza Maleki PhD of Impact Dakota.
