

What is a Host Home?

A Host Home (also called Alternative Family Living – AFL) is a family-style residential option for individuals with intellectual and developmental disabilities (IDD). Instead of living in a group setting, individuals join a caring host family who provides support in a safe, nurturing home.

Why Choose a Host Home?

Family Environment: Care provided in a warm, home-like setting.

Independence & Belonging: Encourages life skills, friendships, and community engagement.

Personalized Matching: Careful placement to ensure comfort, safety, and support.

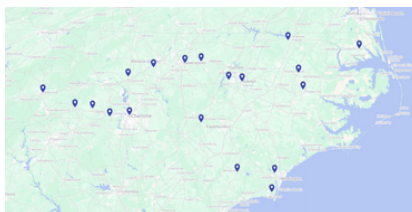

Holistic Supports: Up to 40 hours weekly of services such as Day Support, Community Networking, and Supported Employment.

Who Can Benefit?

Host Homes are ideal for individuals with IDD who need a stable, supportive living arrangement—especially those who thrive in smaller, more individualized care settings. Homes can also support individuals with medical, behavioral, or mobility needs, including wheelchair accessibility.

Where Are Host Homes Available?

Host Homes are ideal for individuals with IDD who need a stable, supportive living arrangement—especially those who thrive in smaller, more individualized care settings. Homes can also support individuals with medical, behavioral, or mobility needs, including wheelchair accessibility. With over 20 office locations across North Carolina, we have multiple open hosts available for interview.
