**CLASS DESCRIPTIONS –**

**Understanding of NFPA 14 – 4 hours**
The 2013 editions of NFPA’s fire standpipes standards are now available and new rules are being applied to system design and installation practices. New and revised terms, requirements, and applications may impact your strategies relating to project estimating, purchasing, plan review, installation and testing practices. Having the latest and greatest knowledge provides a real advantage over those who are not applying these changes. Upon completion of this seminar, attendees should be able to identify new and revised requirements for fire standpipe system design, installation and testing; demonstrate an ability to navigate the standard utilizing the table of contents and indexes within. This class will include in addition to the NFPA requirements, state requirements as they apply to high-rise applications of this new edition to project specific designs and installations including pressure regulating/restricting devices. This will be an information packed class for anyone involved in fire protection design, installation, testing and code enforcement.

**Understanding of NFPA 20 - 4 hours**
This half-day seminar provides a comprehensive review of the 2013 edition of NFPA 20. Upon completion, attendees will be able to restate the scope of the standard, identify the types of fire pumps and their performance characteristics. Attendees will participate in an in-depth discussion regarding the selection, installation, inspection and testing of fire pumps, and the associated valves used in these systems. Attendees will leave the seminar with a greater understanding of how to apply the requirements for all fire pump systems. If you are a contractor, inspector, building owner or manager, AHJ, or engineer this seminar is for you.

**NFPA 14 and 20 CLASS – 8 HOURS**
This seminar provides a comprehensive review of the 2013 editions of NFPA 14 and NFPA 20

8 Credit/Contact Hours; 8.0 CPDs (NICET)

**INSTRUCTOR – Bob G. Caputo, CFPS, CET**
Bob Caputo has more than 25 years’ experience in the fire protection community including all areas of the fire sprinkler industry. A former fire fighter trained in fire suppression at the U.S. Naval Fire Fighting Training Center in San Diego, Bob has been an instructor since 1989, teaching seminars for both American Fire Sprinkler Association (AFSA) and NFPA. He holds fire sprinkler contracting licenses in multiple states, serves on the NFPA 13 Installation Committee and is the author of AFSA’s Project Management Tools program. He was named FPC Magazine’s “Man of the Year“ in 1997, San Diego County Fire Prevention Officer of the Year in 1994 and recently AFSA’s Harry Parmelee Award.

HOTELS - There are several hotels nearby. We do NOT have a special rate for any of them. Quality Inn, Country Inn, Hampton Inn, Embassy Suites, and Best Western are all nearby.

Lunch will be catered BBQ with sides and drinks included in the cost of the class.

*NICET*
