

Table of Contents

| | |
|--|-----------|
| Chapter 1 – Introducing Applied Econometrics through Smoothing | 11 |
| Univariate Smoothing | 12 |
| Equally-Weighted Smoothing | 14 |
| Exponentially-Weighted Smoothing | 14 |
| Application: Volume of Bankruptcies..... | 15 |
| Seasonal Adjustment | 17 |
| Application: Palm Oil Production | 20 |
| Chapters 2 -10: Assessing the Influence of Explanatory Variables..... | 22 |
| Chapter 2 - Cross-Section Basics | 23 |
| Explanatory Variables: Exogenous or Endogenous?..... | 24 |
| Forming a Model | 24 |
| Feature to Model..... | 25 |
| Application: Birthweights and Smoking | 26 |
| Chapter 3 – Interpreting the Effects of Explanatory Variables | 29 |
| Indicator Variables | 30 |
| Modeling the Mean with Ordinary Least Squares | 31 |
| Collinearity and the Trap..... | 34 |
| Multiple Explanatory Variables..... | 36 |
| Quadratic Explanatory Variables..... | 37 |
| Confidence Intervals..... | 39 |
| Interaction Terms..... | 40 |
| Causal Effect | 41 |
| Chapter 4 – Heteroskedasticity and Inference | 43 |
| Tests of Significance with Heteroskedasticity..... | 44 |
| Homoskedasticity and Heteroskedasticity..... | 45 |
| Testing for Heteroskedasticity | 48 |
| Weighted Least Squares | 50 |
| Chapter 5 – Moving Beyond the Mean | 53 |
| Distribution Features - Quantiles..... | 54 |
| Estimation of Quantiles | 54 |
| Linear Probability Model..... | 56 |

| | |
|--|-----------|
| Chapter 6 – Interval-Coded Data | 59 |
| Application: Earnings and Height | 60 |
| Correlation | 61 |
| Interval Data | 61 |
| Modeling Bimodal Data | 63 |
| Upper Mode | 64 |
| Logit and Probit Models | 66 |
| Interpreting the Coefficients of a Logit Model..... | 69 |
| Chapter 7 – Omitted Variables Bias and Instruments | 71 |
| Omitted Variable Bias | 72 |
| Instrumental Variable | 73 |
| Two-Stage Least Squares | 73 |
| Determining the Effect of Military Service on Civilian Wages | 74 |
| Instrument Relevance | 75 |
| Binary Instruments | 76 |
| Random Assignment with Compliance..... | 76 |
| Random Assignment with Non-Compliance..... | 77 |
| Non-Random Assignment but a Randomly Assigned Instrument | 77 |
| Tests of Hypotheses Associated with Econometric Models..... | 78 |
| Chapter 8 – Omitted Variables Bias and Panel Data | 81 |
| Panel Data..... | 82 |
| Panel Data and Omitted Variables Bias..... | 83 |
| Omitted Variables and Error Components | 85 |
| First-Difference Models | 85 |
| Indicator Variable Models | 86 |
| Fixed-Effects Model..... | 88 |
| Test of Significance | 90 |
| Project: The Origins of Growth..... | 91 |
| Chapter 9 – Panel Data and Two-Way Fixed-Effects | 95 |
| Two-Way Fixed-Effects Model..... | 96 |
| Estimation with a Balanced Panel | 96 |
| Estimation with an Unbalanced Panel | 97 |
| Benefits, Costs, and Explanatory Power..... | 97 |
| Test of Significance | 98 |
| Project: Alcohol Taxes and Traffic Fatalities Updated | 98 |

| | |
|--|------------|
| Chapter 10 - Censored Data..... | 102 |
| Overview of Censored Response Models..... | 103 |
| Estimation of the Tobit Model..... | 103 |
| Calculation of the Appropriate Marginal Effects of the Tobit Model..... | 104 |
| The Heckman Sample Selection Procedure..... | 108 |
| Calculation of the Appropriate Marginal Effects for the Heckman Procedure..... | 109 |
| Interpreting Logs and Levels..... | 111 |
| Chapter 11 – Simultaneous Systems..... | 112 |
| Preamble to Multi-Equation Models..... | 113 |
| Structural Specification and Analytically-Derived Reduced-Form Specification..... | 113 |
| Simultaneous Equation Model..... | 113 |
| Two-Equation Model..... | 115 |
| Analytically Derived Reduced Forms..... | 116 |
| The Issue of Identification..... | 116 |
| Order and Rank Conditions for Identification..... | 117 |
| Order Conditions..... | 117 |
| Rank Conditions..... | 118 |
| Limited Information Methods of Estimation..... | 121 |
| Full Information Methods of Estimation..... | 123 |
| Comparison of Limited Information and Full Information Estimators of Simultaneous Equation Models..... | 125 |
| Dynamics in Linear Systems of Simultaneous Equations..... | 125 |
| Stability Conditions of Simultaneous Equation Models..... | 128 |
| Final Form of the System..... | 129 |
| Determining Whether a System is Stable or Not..... | 129 |
| Prediction: Chapters 12-16..... | 144 |
| Chapter 12 – Time-Series Regression..... | 144 |
| Features of Time-Series Data..... | 145 |
| Application: Railcars and Power Generation..... | 145 |
| Nonstationarity..... | 147 |
| Modeling Growth Rates – Granger Precedence Tests..... | 149 |
| Model Comparison..... | 151 |
| Forecasting Levels from Growth Rates..... | 152 |
| Chapter 13 – Serial Correlation and Inference..... | 154 |
| Definition of Serially Correlated Errors..... | 155 |
| Robust Standard Errors..... | 156 |

| | |
|---|------------|
| Serial Correlation Tests | 157 |
| Generalized Least Squares..... | 159 |
| Chapter 14 – Highly Correlated Explanatory Variables, Structural Change, and Stability of Structural Coefficients..... | 162 |
| Definition, Prevalence and Consequences of Collinearity | 163 |
| Formal Definition of Collinearity..... | 164 |
| Formal Diagnostics of Collinearity | 165 |
| Variance Inflation Factors (VIFs) | 166 |
| Variance Decomposition Proportions | 167 |
| An Example..... | 168 |
| Solution(s) to the Collinearity Problem..... | 168 |
| Ridge Regression | 169 |
| Ridge Trace of Estimates for California Central Valley Region..... | 170 |
| Structural Change, and Stability of Structural Coefficients | 171 |
| Definition of Structural Change | 171 |
| Gradual or Abrupt Structural Change: The Use of Recursive Coefficients..... | 171 |
| Formal Tests of Parameter Instability..... | 172 |
| Solutions to Structural Change or Parameter Instability Issue | 181 |
| Chapter 15 – Modeling the Variance | 183 |
| Overview of ARCH and GARCH Models | 184 |
| The ARCH(q) Model..... | 185 |
| GARCH Model..... | 185 |
| Mechanics of the ARCH Model and the GARCH Model | 186 |
| Extensions of the ARCH Model and the GARCH model | 187 |
| GARCH in Mean or GARCH-M Model | 188 |
| Chapter 16 - Distributed Lag Models – On the Path to Machine Learning..... | 191 |
| Overview of Distributed Lag Models | 192 |
| Mechanics of the Approaches to Estimating Distributed Lag Models | 193 |
| Commentary | 207 |
| PowerPoint Presentation | 209 |
