

Advances in Indolent Lymphomas and Lymphoproliferative Disorders

Moderators: James Cook, MD, PhD, Cleveland Clinic, and **Lorinda Soma, MD**, University of Washington Medical Center

The 2020 Society for Hematopathology Companion Meeting will focus on recent advances in the indolent non-Hodgkin lymphomas as well as the increasingly recognized chronic lymphoproliferative disorders that may behave in a non-malignant fashion. While the WHO classification was updated in 2016, more recent studies have added to our understanding of these complex disorders. Topics to be addressed include a clinician's view of monoclonal B-cell lymphocytosis/early stage chronic lymphocytic leukemia, follicular lymphoma including related indolent subtypes, non-nodal mantle cell lymphoma, the heterogeneity of Extranodal MALT lymphoma including subtypes of cutaneous marginal zone lymphomas, indolent T-cell and NK-cell disorders of the gastrointestinal tract, and viral-associated lymphoproliferative disorders. This session will familiarize pathologists with the latest findings in these challenging lymphoid proliferations and provide guidance to assist in appropriate diagnosis and classification.

Introduction

James R. Cook, MD, PhD
Cleveland Clinic

A Clinician's View of Monoclonal B-cell Lymphocytosis/Early Stage CLL

Steven Coutre, MD
Stanford Medicine

Follicular Lymphoma and Related Indolent Variants

German Ott, MD
Robert-Bosch-Krankenhaus

Indolent Variants of Mantle Cell Lymphoma

Elías Campo, MD, PhD
Hospital Clinic Barcelona, University of Barcelona

Cutaneous Marginal Zone Lymphomas

Steven H. Swerdlow, MD
University of Pittsburgh School of Medicine

Indolent T-cell and NK-cell Lymphoproliferative Disorders of the GI Tract

Judith A. Ferry, MD
Department of Pathology
Massachusetts General Hospital

Viral Associated Lymphoproliferative Disorders with Indolent Behavior

Yaso Natkunam, MD, PhD
Pathology
Stanford University Medical Center
