

**Dana Marlowe, PhD, LCSW**  
**Associate Clinical Professor**  
**Fordham University Graduate School of Social Service**

Dana Marlowe received her PhD in 2000 from Fordham University Graduate School of Social Service; a Master of Social Work degree from the State University of New York at Buffalo (1992); and a Bachelor of Arts degree from the State University of New York at Binghamton (1990). She has been a Clinical Professor at Fordham GSS since 2005. She teaches in the Practice Area and Policy Area. She also teaches three advance practice classes: Evidence Based Practice With Children and Families, Core Concepts of Child and Adolescent Trauma, and Group Work Methods.

Dr. Marlowe has professional practice experience in both clinical and administrative areas. Her professional practice has been in the field of mental health and health, specifically in the field HIV/AIDS. She began her clinical practice working in the field of substance abuse, primarily with children whose parents were substance abusers. She also worked with helping children affected by the Chernobyl nuclear disaster from 1992-1995, making three humanitarian missions to Belarus.

In 1995, Dr. Marlowe began working as the Program Coordinator for the Nyack Hospital Pediatric AIDS Program, providing both direct services and administrative oversight. She became the Clinical Coordinator of Together Our Unity Can Heal, an HIV/AIDS service organization in 1998. In 2000, she returned to Nyack Hospital, again providing coordination to the Pediatric AIDS Program. During her time at Nyack Hospital, she served on Ryan White Title I and Title II Steering Committees. She also implemented an HIV counseling and testing program for children and adolescents in foster care. During this time, she lead the hospital in obtaining a five year grant for a comprehensive family centered HIV/AIDS medical program. Her dissertation, written while she was earning her doctorate at Fordham University, examined factors affecting social workers' decision to breach confidentiality of HIV-positive clients in order to warn third parties.

Since 2000, Dr. Marlowe has been a trainer for the New York City HIV/AIDS Service Administration, teaching workshops in HIV and families, cultural competence, and mental health. In 2010, Dr. Marlowe returned to Nyack Hospital as a consultant to be the lead administrator in the process of closing their comprehensive HIV/AIDS medical program.

Dr. Marlowe is an active member of the Child and Family Evidence Based Practice Consortium, presenting at the national child, adolescent, and young adult behavioral health conference and speaking in two national webinars on evidence based practice implementation in 2015. She has also participated in a national research group examining evidence based practice content in graduate programs.

Dr. Marlowe has worked under the Fordham University Trauma Center as a consultant in helping organizations to implement evidence based trauma treatments. She is also been an active member of the CSWE Trauma Competency Workgroup, helping to develop advanced trauma competencies for schools of social work. She currently teaches the class, Core Concepts in Child and Adolescent Trauma at Fordham University. She is trained in EMDR and provides clinical treatment to those suffering from PTSD and other trauma related symptoms.

Dr. Marlowe is currently conducting qualitative research examining service needs of women living with the BRCA1 or BRCA2 genetic mutation.
