# UPDATED SIDE MENU

We're excited to introduce a fresh new improvement: an updated side menu. Though the menu looks brand new, most changes are cosmetic, with just a few updates to the navigation.

New Look

1 The interface has been updated with a light color scheme and modern user interface to improve the user experience

2 Icons have been added to each section, making it easier to find what you're looking for

3 Your picture has been added to the My Profile section

4 The Logoff button is now below in its own section
