

Solving Quality Team Staffing Challenges

Hosted by the Paraneet Quality Manager Advisory Group

The Talent Supply and Demand Dynamics in today's manufacturing environment have become one of the "Critical X's" in maintaining/improving quality.

Getting the organization to prioritize filling Quality team staff openings while the business is trying to fill manufacturing positions is as serious an issue as actual quality problems.

Join us to hear how **Husco International** is using an innovative training program to properly on-board and retain new talent. **Experis Engineering** will talk about how they are helping clients improve new hire success rates and retention.

The agenda will be participant-driven; possible discussion topics include:

- **Recruiting** top Quality candidates.
- Successful **on-boarding and training** programs.
- **Reducing turnover**.
- **Documenting "tribal knowledge"**.
- **Integrating quality metrics** into Performance Evaluations.
- **Systems** that communicate within an organization, and with supplier systems
- **Using automation** to improve quality.

Tuesday, May 21, 2019

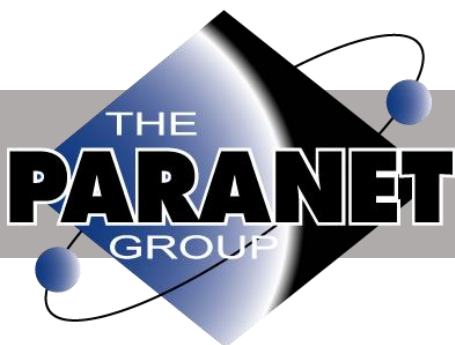

8 AM – 12 PM

**Paraneet Group Headquarters
Lobby Training Room**

Ed Panelli
Group Director

Hosted by Paraneet's Quality Manager Advisory Group and facilitated by Ed Panelli, Quality Group Director.

Pass it On!
